Tables:
1.Events Table
```
    CREATE TABLE Events (
    event_id INT PRIMARY KEY AUTO_INCREMENT,
    event_name VARCHAR(100),
    event_date DATE,
    venue VARCHAR(100),
    total_seats INT,
    ticket_price DECIMAL(10,2)
);
```

2.Participants Table
```
    CREATE TABLE Participants (
    participant_id INT PRIMARY KEY AUTO_INCREMENT,
    participant_name VARCHAR(100),
    email VARCHAR(100) UNIQUE,
    phone VARCHAR(15)
);
```

3.Tickets Table
```
CREATE TABLE Tickets (
    ticket_id INT PRIMARY KEY AUTO_INCREMENT,
    event_id INT,
    participant_id INT,
    seat_number INT,
    booking_date DATE,
    FOREIGN KEY (event_id) REFERENCES Events(event_id),
    FOREIGN KEY (participant_id) REFERENCES Participants(participant_id)
);
```

4.Payments Table
```
CREATE TABLE Payments (
    payment_id INT PRIMARY KEY AUTO_INCREMENT,
    ticket_id INT,
    amount_paid DECIMAL(10,2),
    payment_date DATE,
    payment_status VARCHAR(20),
    FOREIGN KEY (ticket_id) REFERENCES Tickets(ticket_id)
);
```

Insert Data:

1.Insert Events
```
INSERT INTO Events (event_name, event_date, venue, total_seats, ticket_price) VALUES
('Music Concert', '2026-03-10', 'Hyderabad', 100, 1500),
('Tech Conference', '2026-04-15', 'Bangalore', 200, 2500),
('Food Festival', '2026-05-20', 'Chennai', 150, 1000),
('Art Expo', '2026-06-05', 'Mumbai', 80, 1200);
```

2.Insert Participants:
```
INSERT INTO Participants (participant_name, email, phone) VALUES
('Ravi', 'ravi@gmail.com', '9876543210'),
('Sneha', 'sneha@gmail.com', '9876543211'),
('Arjun', 'arjun@gmail.com', '9876543212'),
('Meena', 'meena@gmail.com', '9876543213'),
('Kiran', 'kiran@gmail.com', '9876543214');
```

3.Insert Tickets
```
INSERT INTO Tickets (event_id, participant_id, seat_number, booking_date) VALUES
(1,1,10,'2026-02-01'),
(1,2,11,'2026-02-02'),
(2,3,21,'2026-02-05'),
(2,4,22,'2026-02-06'),
(3,5,5,'2026-02-10'),
(4,1,3,'2026-02-12');
```

4.Insert Payments
```
INSERT INTO Payments (ticket_id, amount_paid, payment_date, payment_status) VALUES
```

```
(1,1500,'2026-02-01','Completed'),
(2,1500,'2026-02-02','Completed'),
(3,2500,'2026-02-05','Completed'),
(4,2500,'2026-02-06','Pending'),
(5,1000,'2026-02-10','Completed'),
(6,1200,'2026-02-12','Completed');
```

Retrieve data:

1.SELECT * FROM Events;

Queries

Low Level:

1.Show All Events with Their Ticket Price

```
SELECT event_name, ticket_price
FROM Events;
```

event_name	ticket_price
Music Concert	1500.00
Tech Conference	2500.00
Food Festival	1000.00
Art Expo	1200.00

```
+-----------------+-------------+
```

2.Show All Tickets Booked by Participant ID = 1

```
SELECT *
FROM Tickets
WHERE participant_id = 1;
+-----------+----------+----------------+-------------+--------------+
| ticket_id | event_id | participant_id | seat_number | booking_date |
+-----------+----------+----------------+-------------+--------------+
|         1 |        1 |              1 |          10 | 2026-02-01   |
|         6 |        4 |              1 |           3 | 2026-02-12   |
+-----------+----------+----------------+-------------+--------------+
```

3.Show All Payments Made on '2026-02-05'

```
SELECT *
FROM Payments
WHERE payment_date = '2026-02-05';
+------------+-----------+-------------+--------------+----------------+
| payment_id | ticket_id | amount_paid | payment_date | payment_status |
+------------+-----------+-------------+--------------+----------------+
|          3 |         3 |     2500.00 | 2026-02-05   | Completed      |
+------------+-----------+-------------+--------------+----------------+
```

4.Count Total Number of Tickets Booked

```
SELECT COUNT(*) AS total_tickets
FROM Tickets;
+---------------+
| total_tickets |
+---------------+
|             6 |
+---------------+
```

5.Show completed payments

```
SELECT * FROM Payments
WHERE payment_status='Completed';
+------------+-----------+-------------+--------------+----------------+
| payment_id | ticket_id | amount_paid | payment_date | payment_status |
+------------+-----------+-------------+--------------+----------------+
|          1 |         1 |     1500.00 | 2026-02-01   | Completed      |
|          2 |         2 |     1500.00 | 2026-02-02   | Completed      |
|          3 |         3 |     2500.00 | 2026-02-05   | Completed      |
|          5 |         5 |     1000.00 | 2026-02-10   | Completed      |
|          6 |         6 |     1200.00 | 2026-02-12   | Completed      |
+------------+-----------+-------------+--------------+----------------+
```

6.Show events in Hyderabad

```
SELECT * FROM Events
WHERE venue='Hyderabad';
+----------+---------------+------------+-----------+-------------+--------------+
| event_id | event_name    | event_date | venue     | total_seats | ticket_price |
+----------+---------------+------------+-----------+-------------+--------------+
|        1 | Music Concert | 2026-03-10 | Hyderabad |         100 |      1500.00 |
+----------+---------------+------------+-----------+-------------+--------------+
```

7.Show ticket price > 1200

```
SELECT event_name, ticket_price
FROM Events
WHERE ticket_price > 1200;
+-----------------+--------------+
| event_name      | ticket_price |
+-----------------+--------------+
| Music Concert   |      1500.00 |
| Tech Conference |      2500.00 |
+-----------------+--------------+
```

8.Count total participants

```
SELECT COUNT(*) AS total_participants
FROM Participants;
+--------------------+
| total_participants |
+--------------------+
|                  5 |
+--------------------+
```

Medium Level:

1.Total tickets booked per event

```
SELECT e.event_name, COUNT(t.ticket_id) AS total_tickets
FROM Events e
LEFT JOIN Tickets t ON e.event_id = t.event_id
GROUP BY e.event_id;
+-----------------+---------------+
| event_name      | total_tickets |
+-----------------+---------------+
| Music Concert   |             2 |
| Tech Conference |             2 |
| Food Festival   |             1 |
| Art Expo        |             1 |
+-----------------+---------------+
```

2.Total revenue per event

```
SELECT e.event_name, SUM(p.amount_paid) AS revenue
FROM Events e
JOIN Tickets t ON e.event_id = t.event_id
JOIN Payments p ON t.ticket_id = p.ticket_id
WHERE p.payment_status='Completed'
GROUP BY e.event_id;
+-----------------+---------+
| event_name      | revenue |
+-----------------+---------+
| Music Concert   | 3000.00 |
| Tech Conference | 2500.00 |
| Food Festival   | 1000.00 |
| Art Expo        | 1200.00 |
+-----------------+---------+
```

3.Show available seats

```
SELECT e.event_name,
       e.total_seats - COUNT(t.ticket_id) AS available_seats
FROM Events e
LEFT JOIN Tickets t ON e.event_id = t.event_id
GROUP BY e.event_id;
+-----------------+-----------------+
| event_name      | available_seats |
+-----------------+-----------------+
| Music Concert   |              98 |
| Tech Conference |             198 |
| Food Festival   |             149 |
| Art Expo        |              79 |
+-----------------+-----------------+
```

4.Participants for Music Concert

```
SELECT p.participant_name
FROM Participants p
JOIN Tickets t ON p.participant_id = t.participant_id
WHERE t.event_id = 1;
+------------------+
| participant_name |
+------------------+
| Ravi             |
| Sneha            |
+------------------+
```

5.Events with more than 1 booking

```
SELECT e.event_name
FROM Events e
JOIN Tickets t ON e.event_id = t.event_id
GROUP BY e.event_id
HAVING COUNT(t.ticket_id) > 1;
+-----------------+
| event_name      |
+-----------------+
| Music Concert   |
| Tech Conference |
+-----------------+

6.Pending payments
SELECT * FROM Payments
WHERE payment_status='Pending';
+------------+-----------+-------------+--------------+----------------+
| payment_id | ticket_id | amount_paid | payment_date | payment_status |
+------------+-----------+-------------+--------------+----------------+
|          4 |         4 |     2500.00 | 2026-02-06   | Pending        |
+------------+-----------+-------------+--------------+----------------+

7.Average ticket price
SELECT AVG(ticket_price) AS avg_price
FROM Events;
+-------------+
| avg_price   |
+-------------+
| 1550.000000 |
+-------------+

8.Total revenue overall
SELECT SUM(amount_paid) AS total_revenue
FROM Payments
WHERE payment_status='Completed';
+---------------+
| total_revenue |
+---------------+
|       7700.00 |
+---------------+

HIGH LEVEL:

1.Participant Who Spent the Most Money
SELECT p.participant_name,
       SUM(pay.amount_paid) AS total_spent
FROM Participants p
JOIN Tickets t ON p.participant_id = t.participant_id
JOIN Payments pay ON t.ticket_id = pay.ticket_id
WHERE pay.payment_status = 'Completed'
GROUP BY p.participant_id
ORDER BY total_spent DESC
LIMIT 1;
+------------------+-------------+
| participant_name | total_spent |
+------------------+-------------+
| Ravi             |     2700.00 |
+------------------+-------------+

2.Event Generating Highest Revenue
SELECT e.event_name,
       SUM(pay.amount_paid) AS total_revenue
FROM Events e
JOIN Tickets t ON e.event_id = t.event_id
